### 2.3. RF Layout Suggestion (aka Keep-Out Area)

Make sure to keep the "No Ground Pad" as wider as you can regardless of the size of your PCB.

No-Ground Pad should be included in the corresponding position of the antenna in **EACH LAYER**.

Place the module towards the edge of PCB to have better performance than placing it on the center.

Welcome to send us your layout in PDF for review at <a href="service@raytac.com">service@raytac.com</a> or your contact at Raytac with title "<a href="Layout reviewing">Layout reviewing —Raytac model no.—YOUR company's name"</a>.

The final end product must be labeled in a visible area with the following: "Contain IC ID: 8017A-MDBT42T".

#### 10. Notes and Cautions

Module is not designed to last for a lifetime. Like general products, it is expected to be worn out after continuous usage through the years. To assure that product will perform better and last longer, please make sure you:

- Follow the guidelines of this document while designing circuit/end-product. Any
  discrepancy of core Bluetooth technology and technical specification of IC should refer to
  definition of Bluetooth Organization and Nordic Semiconductor as final reference.
- Do not supply voltage that is not within range of specification.
- Eliminate static electricity at any cost when working with the module as it may cause damage. It is highly recommended adding anti-ESD components to circuit design to prevent damage from real-life ESD events. Anti-ESD methods can be also applied in mechanical design.
- Do not expose modules under direct sunlight for long duration. Modules should be kept away from humid and salty air conditions, and any corrosive gasses or substances. Store it within -40°C to +125°C before and after installation.
- Avoid any physical shock, intense stress to the module or its surface.
- Do not wash the module. No-Clean Paste is used in production. Washing it will oxidize
  the metal shield and have chemistry reaction with No-Clean Paste. Functions of the
  module are not guaranteed if it has been washed.

The module is not suitable for life support device or system and not allowed to be used in destructive device or systems in any direct or indirect ways. The customer agrees to indemnify Raytac for any losses when applying modules in applications such as the ones described above.
